

Personalized Interview Answer for Abuzar Tamboli

What are your short term and long term goals ?

🕒 Speaking time 41 sec

My short term goals are to simply break into the Information Technology field. As a college graduate, I need to start building a strong presence in the industry, working for a company I respect and doing a job that I enjoy. I am really excited to apply the learnings of my degree - BE / B.Tech to solve real world problems.

My long term goals are to earn new responsibilities within the company, ultimately reaching higher positions as they open and helping the company succeed in the long term.
